

Hight Resolution Results

Dong Zhao, Long Xu, Lin Ma, Jia Li, Yihua Yan

Results in the Manuscript of Pyramid Global Context Network for Image Dehazing

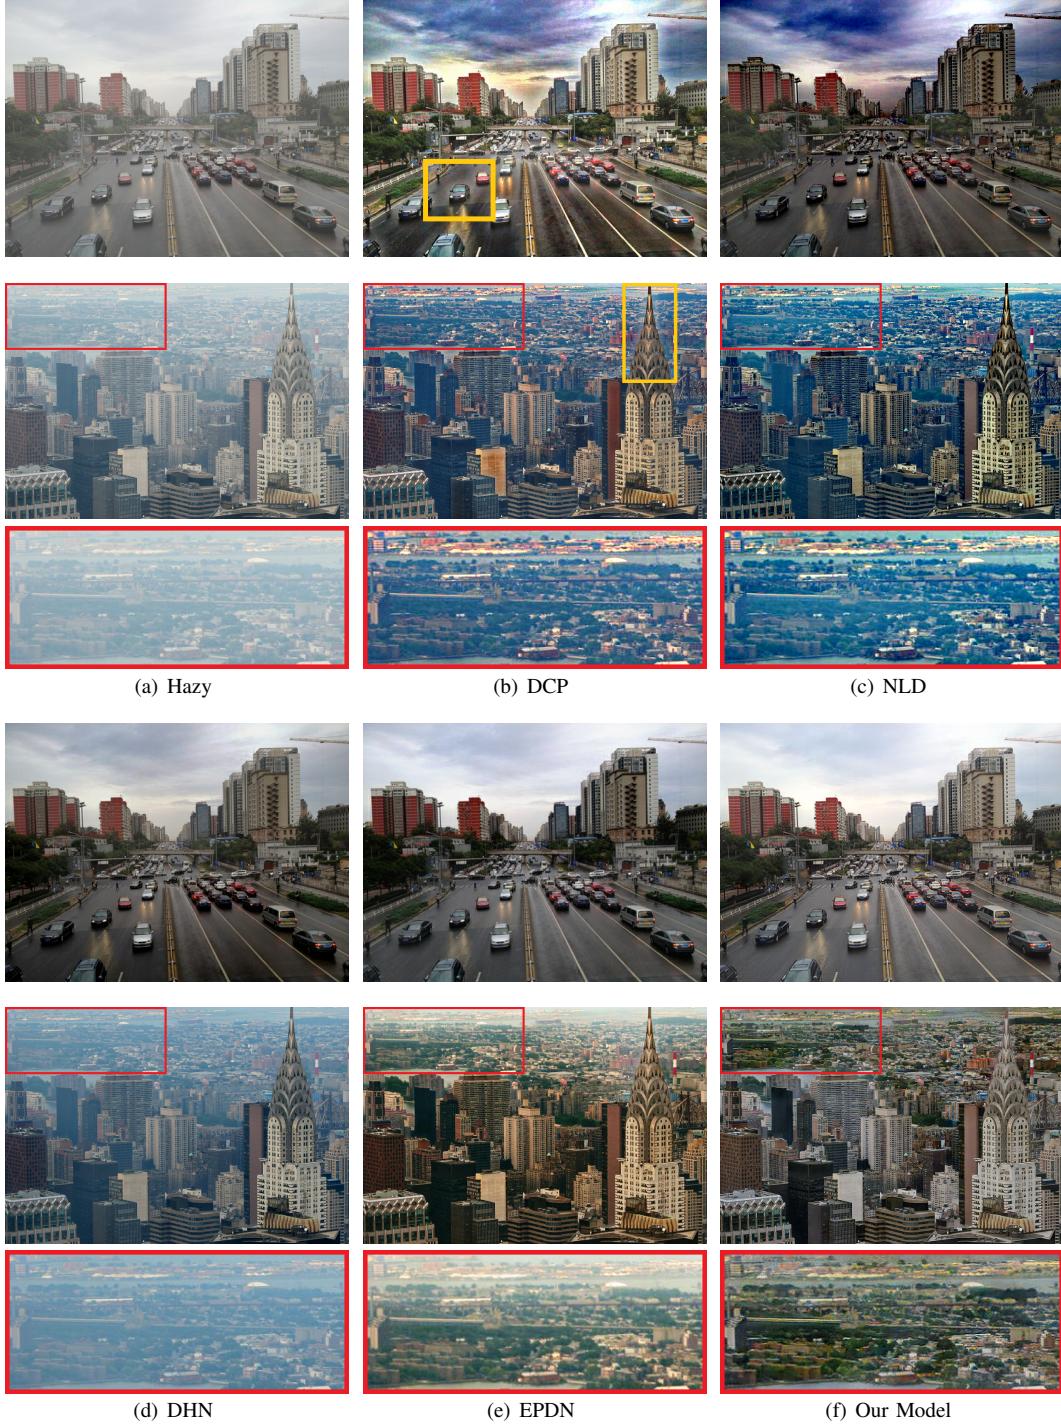

Fig. 1. Dehazing for hazy sky regions (images in the first row) and distant scenes (images in the second row). The last row illustrates the corresponding zoom-in of the red rectangles labeled in the second row. (a): hazy images. (b)-(f): results of DCP [1], NLD [2], DHN [3], EPN [4] and our model.

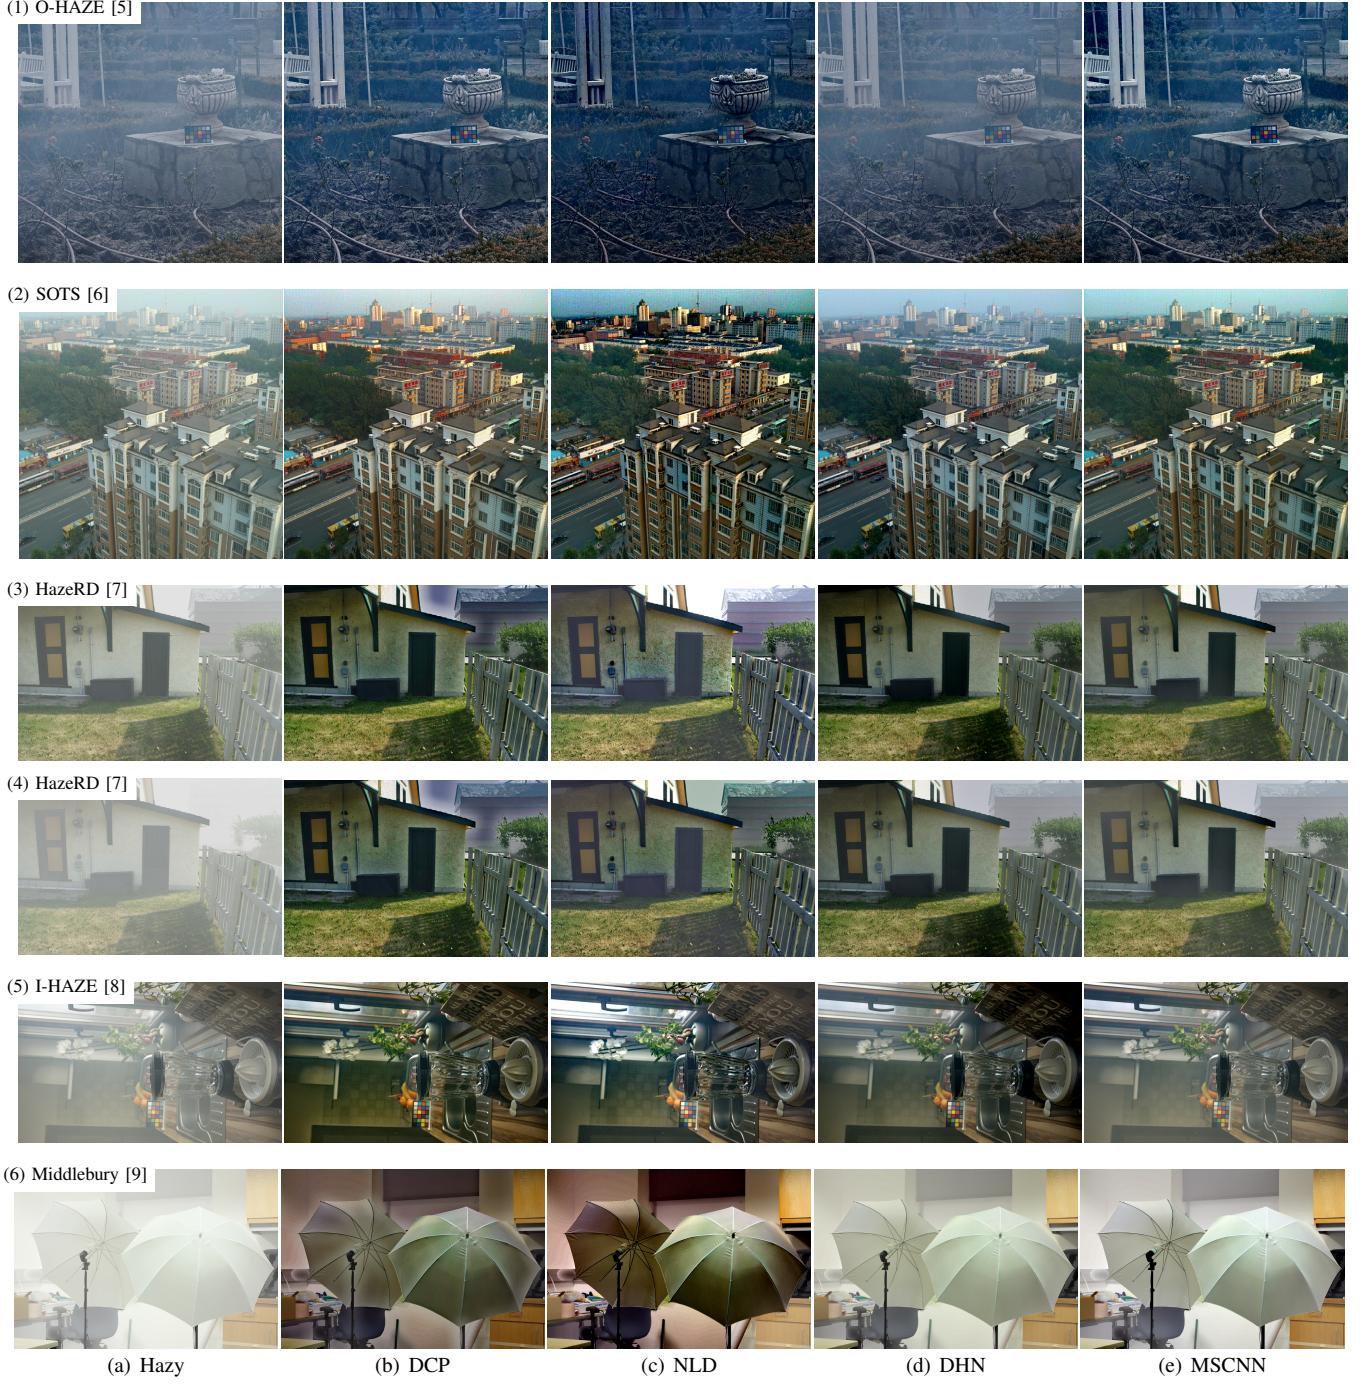

Fig. 2. Qualitative results of synthetic image dehazing (I). (a) is the hazy image. (b)-(e) are the results of DCP [1], NLD [2], DHN [3] and MSCNN [10].

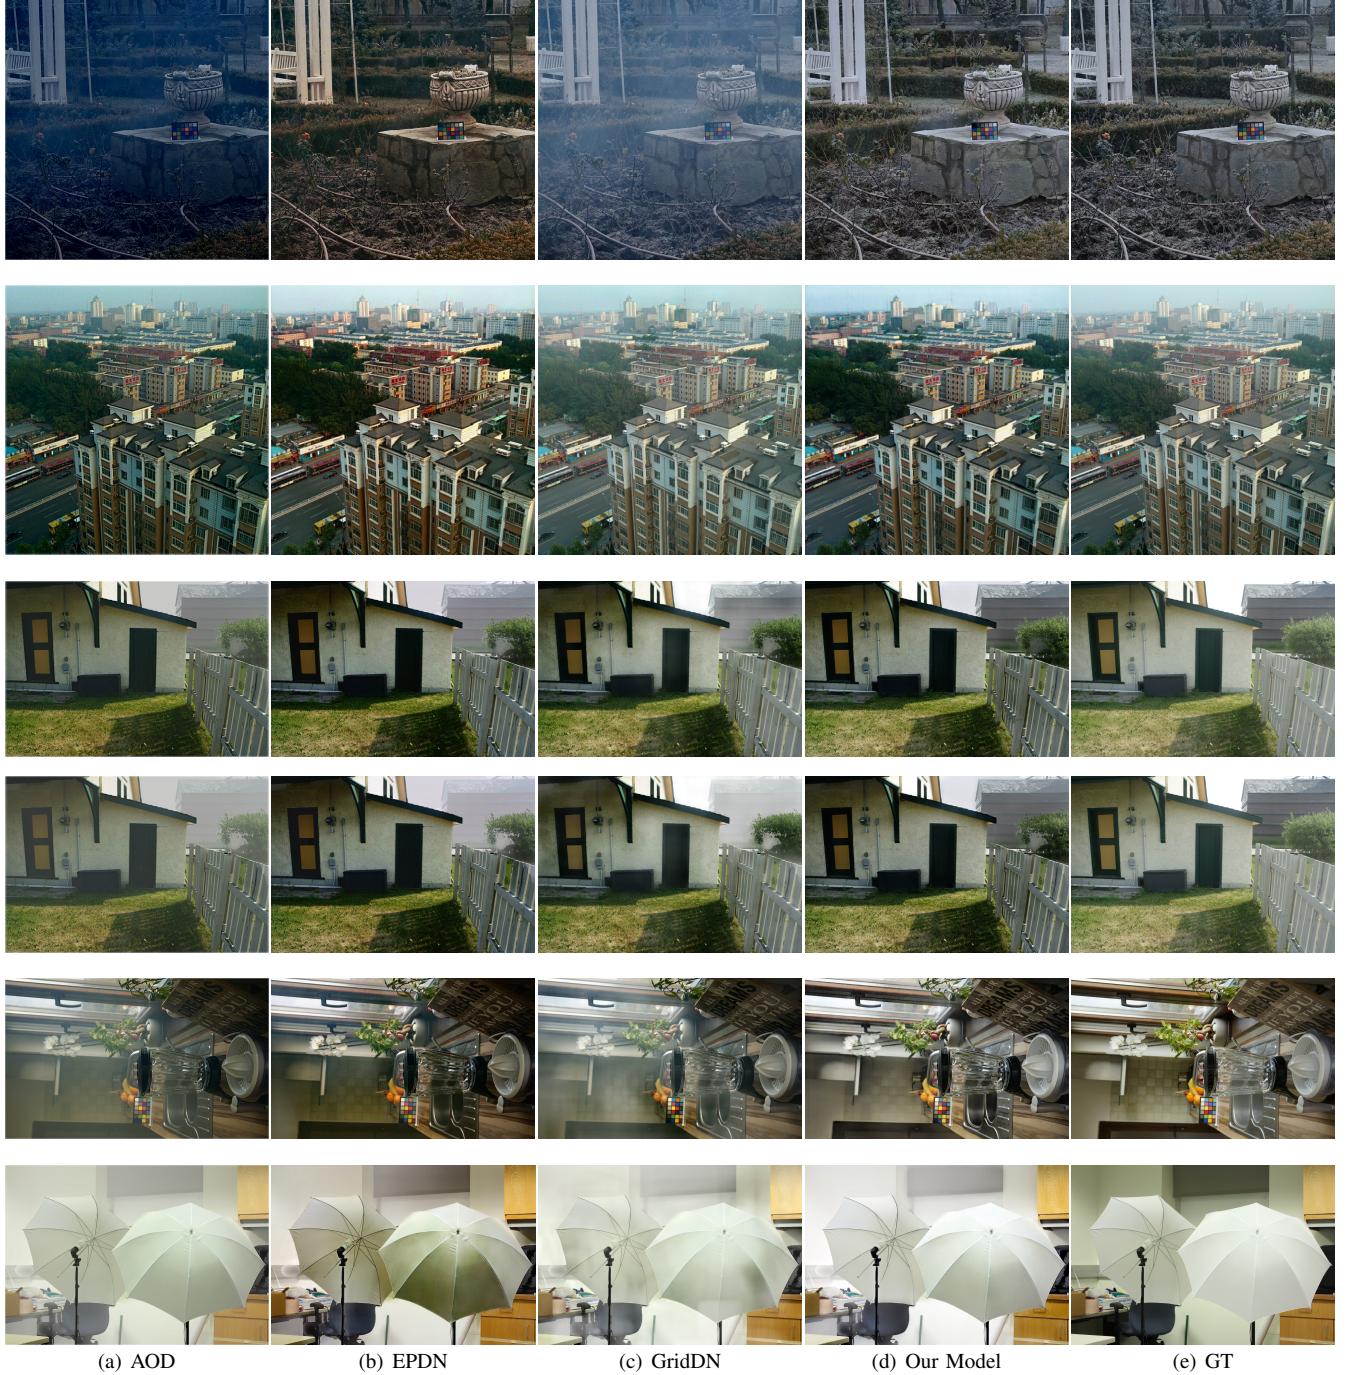

Fig. 3. Qualitative results of synthetic image dehazing (II). (a)-(d) are the results of AOD [11], EPN [4], GridDN [12] and our model. (e) is the ground truth.

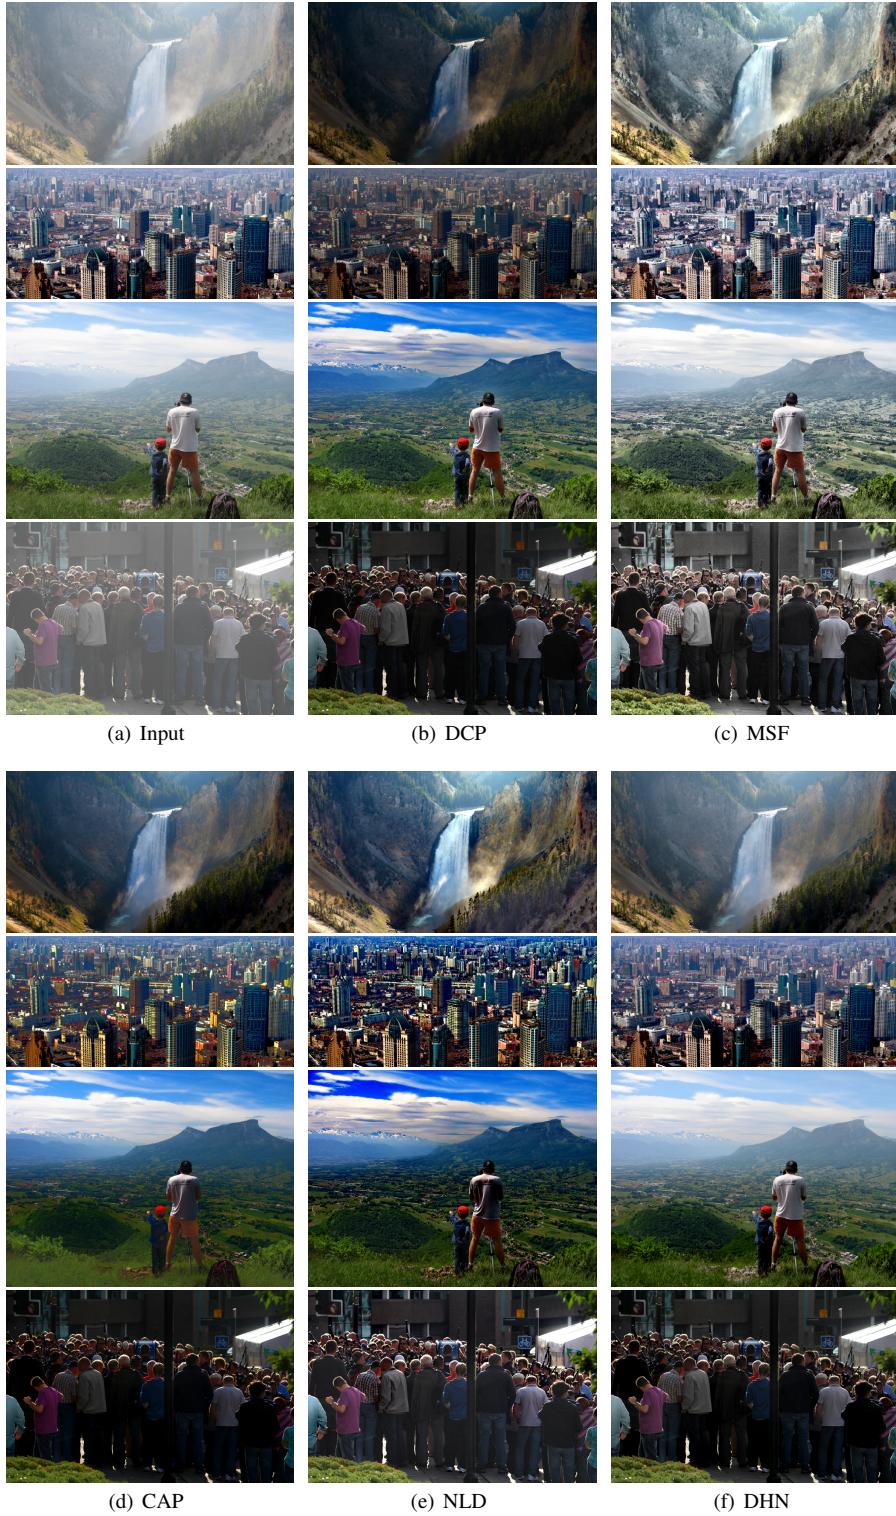

Fig. 4. Qualitative results of real-world image dehazing (I). (a): hazy image. (b)-(f) are results of DCP [1], MSF [13], CAP [14], NLD [2], DHN [3].

Fig. 5. Qualitative results of real-world image dehazing. (a)-(f) are results of MSCNN [10], AOD [11], GFN[15], EPDN [4], GridDN [12], and our results.
